

JOBBYIST SA - Round 1 Equity Ownership Proposal

Private Micro-Seed Launch Capital Proposal. Prepared for early angel investors and strategic supporters. South Africa MVP launch target: 15 July 2026. Platform: <https://za.jobbyist.africa> | Contact: support@jobbyist.africa | Planning date: 3 June 2026.

This document is private circulation only. It is not a public offer, prospectus, financial advice, tax advice or legal advice.

Investor hook

Jobbyist SA is seeking a small, focused launch-capital round to convert a nearly ready platform into a live South African MVP. The round is intentionally lean: acquire and protect critical digital assets, fund the .cv registrar integration deposit, activate AI backend credits, support mobile prototyping and launch with enough operational polish to produce measurable proof points before the next investor phase.

Round target: US\$1,800 / approx R29,466. Minimum close by 1 July 2026: US\$1,350 / approx R22,100. Recommended equity offer: up to 3.0% non-voting/economic ordinary equity for the full target. Implied valuation: approx US\$60,000 post-money / US\$58,200 pre-money.

1. Executive Summary

Jobbyist SA is an Africa-focused job discovery and career management platform being launched in South Africa as a subsidiary initiative of Gravitas Industries Pty Ltd. The platform is designed for jobseekers, working professionals, employers, recruiters and service providers who need a more structured, data-aware and AI-assisted way to connect career intent with real market opportunity.

The immediate objective is to complete the smallest serious funding round required to launch the South African MVP on 15 July 2026 with core infrastructure, integrations and operating capacity in place. This is a high-risk, pre-launch micro-seed round and every rand is tied to launch-critical work.

2. Product, Opportunity and Revenue Model

Jobbyist is positioned at the intersection of job discovery, career readiness, AI-assisted candidate tooling, recruiter workflows and professional identity. The early wedge is practical: help professionals become more visible, organised and effective in the job search process.

MVP components include candidate onboarding, curated job discovery, ATS-ready career assets, workflow management, AI backend services, a resource library, a .cv registrar pathway and mobile prototype testing.

Initial commercial products can include DIY Toolkit (R199-R349), Sprint Lite (R499-R799), Guided Sprint (R999-R1,499) and Premium Sprint (R1,999-R2,999), supported by future B2B, recruiter, professional identity and partnership channels.

3. Funding Ask and Use of Funds

Jobbyist SA is seeking approximately US\$1,800 in Round 1 launch capital. At least 75% of this amount, US\$1,350, should be secured by 1 July 2026 to protect the MVP launch schedule. The remaining US\$450 should close before or during the launch window.

Use of funds: US\$150 digital asset acquisition and protection; US\$1,000 critical platform dependencies, integrations and .cv registrar accreditation; US\$150 AI backend integration services; US\$250 workflow automations, development credits and SEO; US\$250 Android and iOS mobile app development, prototyping and testing.

4. Proposed Equity Ownership Terms

Recommended offer: up to 3.0% equity for the full US\$1,800 target, structured as non-voting ordinary/economic shares unless otherwise agreed. Minimum-close equity is up to 2.25% for US\$1,350 on the same valuation basis.

If Jobbyist SA is not yet separately incorporated and authorised to issue shares, Gravitas Industries Pty Ltd may issue the investment instrument with ring-fenced beneficial economic rights linked to Jobbyist SA until subsidiary share issuance is completed.

Investors should receive no day-to-day operational control, hiring authority, product veto, code ownership, account access or unilateral spending authority.

5. Investor Ticket Examples

US\$250 / approx R4,093 = 0.4167% equity. US\$500 / approx R8,185 = 0.8333%. US\$900 / approx R14,733 = 1.5000%. US\$1,350 / approx R22,100 = 2.2500%. US\$1,800 / approx R29,466 = 3.0000%.

Pre-round ownership remains 100.00% with Gravitas Industries / founders. Minimum close scenario: founder/parent 97.75%, Round 1 investor 2.25%. Full close: founder/parent 97.00%, Round 1 investor 3.00%.

6. Milestones and Timeline

3 June 2026: proposal finalised. By 15 June 2026: investor conversations and soft commitments. By 1 July 2026: minimum close, 75% funded. 1-14 July 2026: launch readiness sprint. 15 July 2026: South Africa MVP launch. 31 July 2026: first launch performance snapshot. Q3-Q4 2026: second-phase investor readiness.

7. Risk Factors and Investor Protections

Key risks include pre-launch execution risk, integration dependency risk, regulatory and privacy risk, customer acquisition risk, employment-outcome risk, AI cost and reliability risk, currency risk and future dilution risk.

Recommended protections include signed subscription, shareholder or SAFE/convertible documentation, approved use of funds, monthly updates until launch, quarterly updates thereafter, retained receipts and confidentiality around investor materials, partner terms, credentials and user data.

8. Legal and Compliance Disclaimers

This document is for private discussion with selected potential investors only. It is not a public offer, prospectus, solicitation to the general public, financial advice, tax advice or legal advice.

Any investment is speculative and high risk. Early-stage startups may fail, and investors may lose all invested capital. No return, dividend, exit, liquidity event, valuation increase, job placement outcome or future fundraising success is guaranteed.

All final terms are subject to legal documentation, board/shareholder approvals where applicable, tax/accounting review and compliance with South African company law and applicable securities, exchange control, consumer protection, privacy and fundraising requirements.
